github.com/yantongggg/portfolio

EDUCATION

2022 - 2025 **Asia Pacific University (APU), Malaysia** *B.Sc. (Hons) Computer Science (Cyber Security)*

- **Academic Standing:** CGPA 3.81/4.00, First Class Distinction
- **Focus:** Penetration testing, web/API/mobile security, cloud security, AI/ML security and secure software development.

VENTURE & WORK EXPERIENCE

2026 - Present **BUNKERGUARD AI | Top 5 Worldwide, SuperAI NEXT Hackathon 2026** *Chief Executive Officer*

- **Product & Market:** Leading an AI maritime fuel-verification layer that reconciles BDN/eBDN, mass-flow-meter data and supporting evidence before sign-off to surface short-delivery, fraud and data-integrity risks.
- **Architecture:** Built a five-stage human-in-the-loop workflow with four autonomous agents; combined OCR/data enrichment, 26 deterministic anomaly rules, risk scoring and SHA-256 evidence reports to produce verification results in ~90 seconds.
- **Traction:** Achieved a Top 5 finish at SuperAI NEXT Singapore from a global cohort of 200 builders; subsequently selected as an Ocean Hackathon 2026 Challenge Owner and advanced past the first phase of Swiss Innovation Challenge Asia.

01/2026 - Present **Maybank HQ, Menara Maybank** *Security Engineer & Developer*

- **Offensive Security:** Conduct UAT penetration testing across web, API and mobile applications, covering authentication, authorization, business logic, session security and platform controls.
- **Security Validation:** Assess applications operating behind Akamai and other enterprise security controls, validating security behaviour, bypass scenarios and remediation effectiveness in UAT environments.
- **Security Engineering:** Build AI-assisted penetration-testing and automation workflows to improve test coverage, evidence collection, validation consistency and repeatability across security assessments.

08/2024 - 11/2024 **Maybank HQ, Menara Maybank** *Cybersecurity Intern*

- **Penetration Testing:** Tested web, mobile, API, infrastructure and NAC environments; identified critical weaknesses in payment APIs, OTP flows and wireless networks.
- **Reporting & Compliance:** Delivered structured security reports and exploit validation aligned with Bank Negara Malaysia (BNM) RMiT expectations.

06/2024 - 07/2024 **PayNet | AWS re/Start Program** *Cloud Trainee*

- **Cloud Engineering:** Hands-on with EC2, IAM, RDS, S3 and CloudWatch across compute, storage, networking, security and monitoring; earned AWS Certified Cloud Practitioner.

COMPETITIONS & TECHNICAL PROJECTS

10/2026 **Ocean Hackathon 2026 | BunkerGuard AI** *Challenge Owner*

- **Challenge Ownership:** Served as Challenge Owner for BunkerGuard, defining a maritime verification challenge around bunker-delivery evidence, short-supply risks and carbon-data integrity.

10/2026 **Qubee | TOKEN2049 Origins Hackathon, Singapore** *Security / Web3*

- **Web3 Security:** Co-developed Qubee, a blockchain security solution focused on threat detection and asset protection.
- **Testnet Validation:** Integrated Web3 technologies and validated core security capabilities through testnet testing.

2026 **CareerX-Ray | Talentbank Tech Hackathon | 2nd Runner-Up** *Product / AI*

- **Career Intelligence:** Built an AI career-readiness platform that benchmarks a user against target roles, identifies skill and experience gaps, surfaces market expectations and converts them into personalised upskilling actions - not just job listings.
- **Competition Result:** Progressed from 1,000+ submissions across 27 countries to 80 shortlisted teams, Top 10 and the final Top 3.

2026 **AdventureX, Hangzhou | 5-Day Hardware & AI Hackathon** *Builder*

- **Rapid Hardware Build:** Shipped two working prototypes in five days at a ~800-participant hackathon while learning smart-ring integration, ESP32 development boards and IoT workflows from scratch.
- **Smart-Ring Social Discovery:** Paired wearable physiological signals with a mobile app and preference-based nearby matching to trigger discreet haptic alerts when a potentially compatible person is nearby.
- **TiTO Sentinel:** Built a Tuya smart-home security ecosystem with ESP32 local speaker alerts, mobile notifications and blockchain-notarised evidence hashes for suspected smart-device compromise.

2026 **KongsiGo | TNG Digital FINHACK** *Security / Product*

- **Shared-Wallet Engine:** Built Trip and Family pools around atomic double-entry ledgering, shared contributions and collaborative spend approvals so groups can operate from one balance instead of manually reconciling every expense afterward.
- **Security Architecture:** Designed device-bound Phone + PIN approval and HMAC-sealed passwordless login with AWS Lambda verification, challenge/nonce replay protection, custom QR onboarding and a ZKP-style privacy direction; Alibaba Cloud supported the wider application layer.
- **AI & Risk:** Integrated on-device transaction classification and anomaly detection (DistilBERT + Isolation Forest) with Pool and Main agents for budget health, smart splits, suspicious activity and in-app assistance.

SELECTED TECHNICAL PROJECTS

2025 **MyLayak | NexG Godamlah! 2.0 Smart ID Hackathon | Champion - Security Track** *Security Architect*

• **Zero-Trust Eligibility:** Architected a privacy-preserving government-subsidy discovery platform using dual-layer steganographic QR authentication, server-side token issuance, pattern obfuscation and BB84 quantum-key-distribution concepts.

2026 **eKYC Biometric Authentication System | MIJC2026 Gold Award** *Research / FYP*

• **AI-Resilient Identity:** Designed multimodal authentication combining facial recognition, liveness detection and behavioural biometrics for continuous post-login verification against deepfakes, synthetic identities and session hijacking.

2026 **LUNA | Blueprint Hackathon Finalist** *Full-Stack / AI*

• **Safety & Digital Evidence:** Built a safety app disguised as a period tracker with an encrypted evidence vault, AI forensic analysis and deepfake-photo immunisation using adversarial perturbation plus steganographic SHA-256 verification.

2026 **Wira | Borneo Hackathon** *Full-Stack / Resilience*

• **Disaster Readiness:** Developed an ASEAN-focused gamified preparedness platform spanning 10 countries, with an offline emergency toolkit for mesh networking, GPS sharing and distress-signal detection plus AR training simulations.

2025 **JetCycle | Sparkathon (APU x BAT) | Champion + Best Demo** *Product / AI*

• **AI Tech Swap Station:** Designed an AI-powered smart kiosk with a robotic arm for automated e-waste dismantling and component categorisation, covering the workflow from device scanning to digital reward distribution.

2025 **Trendify | EY Young Technology Professional Challenge | Top 15 / 100+** *Data / Product*

• **Supply-Chain Intelligence:** Architected a scalable SAP-powered market-intelligence concept with predictive modelling to help Malaysian businesses anticipate demand shifts and respond earlier.

SECURITY RESEARCH

2026 **Open-Source Vulnerability Research** *Bug Bounty / CVE Researcher*

SEV.	VULNERABILITY	PROJECT	ID
HIGH	Stored XSS via unauthenticated SVG file upload	heyform/heyform	CVE-2026-45797
HIGH	SSRF via unauthenticated image proxy	heyform/heyform	GHSA-3j2g-3q97-fvv5
HIGH	Arbitrary file write via cache path traversal	compliance-trestle	GHSA-mj4x-vf5c-5xg8
MOD	SSRF in remote-fetching subsystem	compliance-trestle	CVE-2026-46380
MOD	Mass assignment / user-ID spoofing	open-webui/open-webui	CVE-2026-45396
HIGH	Cross-user credential theft via GraphQL resolvers	hoppscotch/hoppscotch	GHSA-8f4j-54f5-62hh

HONORS

• Top 5 Worldwide, SuperAI NEXT Hackathon - BunkerGuard AI, Singapore *2026*
• 2nd Runner-Up, Talentbank Tech Hackathon - CareerX-Ray *2026*
• Champion - Security Track, NexG Godamlah! 2.0 - MyLayak *2025*
• Champion + Best Demo, Sparkathon (APU x BAT) - JetCycle *2025*
• Gold Award, MIJC2026 Virtual Innovation - eKYC Biometric Authentication *2026*
• Top 15 / 100+ Teams, EY Young Technology Professional Challenge - Trendify *2025*
• Blueprint Hackathon Finalist - LUNA Women's Safety App *2026*
• Challenge Owner, Ocean Hackathon 2026 - BunkerGuard AI *Oct 2026*

CERTIFICATIONS

• AWS Certified Cloud Practitioner *2024*
• Cisco NetAcad - Switching & Routing Essentials (Merit)

TECHNICAL SKILLS

• **Security:** Penetration Testing, Web/API/Mobile Security, Bug Bounty, Zero Trust, Threat Modeling, AI/ML Security
• **Languages:** Python, TypeScript, Java, SQL, JavaScript, C#
• **Frameworks:** React, React Native, FastAPI, Tailwind CSS, Vite, Supabase, Firebase
• **Tools:** Burp Suite, Frida, Wireshark, Nmap, Git, Docker
• **Cloud & AI:** AWS Lambda, API Gateway, Bedrock, EC2, IAM, RDS, S3, CloudWatch; Vercel; Supabase; LLM agents / RAG concepts
• **Product & Leadership:** Product strategy, stakeholder communication, technical reporting, team leadership, rapid prototyping
